

Dear Parents,

A visit to the dentist should be a fun adventure.

It doesn't need to be a frightening or painful experience for your child. To make this first visit as pleasant as possible, here are a few pointers:

- Your attitude about dental health will have an effect on your child's attitudes and feelings for many years.
- Give your child the benefit of a fresh start with a pleasant experience. Don't show your child any anxieties you may feel about dental visits.
- Explain to your child that he/she should ignore any scary stories about dental visits and can depend on you and the dentist for information.
- We feel that children shouldn't be bribed to go to the dentist, nor should a visit to the dentist be used as punishment. This may affect your child's feelings about dental care for the rest of their life.
- Early examination can uncover existing or potential conditions that may respond to interceptive orthodontic treatment. This early, sometimes simple treatment, could eliminate the necessity and cost of full orthodontic treatment at a later time.

Thanks, we look forward  
to seeing you soon!
